Announcement

Recipients of the 2007 ACTA Student Awards

A team of judges consisting of *Acta Materialia*, *Scripta Materialia*, and *Acta Biomaterialia* editors have completed the evaluation of nominees for the above award. Again, the competition was very keen and there were several excellent candidates. Selecting the winners was a challenging task. Several factors were considered in the evaluation of each nominee: the quality of paper, or papers, for which he or she was nominated, recommendation letters, and leadership potential. The awardees selected from papers published in the above three journals are:

**Acta Materialia**

- Dr. Marcus Young, Northwestern University, USA. “Load partitioning during compressive loading of a Mg/MgB$_2$ composite,” *Acta Materialia* 55, 2007: 3467–3478.

**Scripta Materialia**

- Dr. Herbert Willmann, University of Leoben, Austria. “Single crystal growth of NaCl-structure A–Cr–N thin films on MgO(001) by magnetron sputtering epitaxy,” *Scripta Materialia* 57, 2007: 1089–1092.

**Acta Biomaterialia**

The editors congratulate the awardees and thank all the nominees for their participation. We wish them all the best in their careers.

Subhash Mahajan
